Beautiful Sunset

This is a stunning view of a sunset over the ocean. Sunset (or sundown) is the disappearance of the Sun at the end of the Sun path, below the horizon of the Earth (or any other astronomical object in the Solar System) due to its rotation. As viewed from everywhere on Earth, it is a phenomenon that happens approximately once every 24 hours, except in areas close to the poles.

Majestic Mountains

Behold the majestic mountains standing tall and proud. Majestic Mountain is part of the Okanogan Range which is a sub-range of the North Cascades, and is situated on land administered by the Okanogan–Wenatchee National Forest. The mountain is a long ridge paralleling Mill Creek, and has several subpeaks, the highest of which is the North Peak (7,510 ft). The nearest higher peak is Mount Ballard, 1.9 miles (3.1 km) to the east.
